Discover More about the A00-260 Certification

Are you interested in passing the SAS A00-260 exam? First discover, who benefits from the A00-260 certification. The A00-260 is suitable for a candidate if he wants to learn about Data Management. Passing the A00-260 exam earns you the SAS Certified Data Integration Developer title.

While preparing for the A00-260 exam, many candidates struggle to get the necessary materials. But do not worry; your struggling days are over. The A00-260 PDF contains some of the most valuable preparation tips and the details and instant access to useful [A00-260 study materials just at one click](#).

A00-260 SAS Data Integration Developer Certification Details:

Exam Name	SAS Certified Data Integration Developer
Exam Code	A00-260
Exam Duration	105 minutes
Exam Questions	76 multiple-choice and short-answer questions
Passing Score	70%
Exam Price	\$180 (USD)
Training	SAS® Data Integration Studio: Fast Track
Exam Registration	Pearson VUE
Sample Questions	SAS Data Integration Developer Certification Sample Question
Practice Exam	SAS Data Integration Developer Certification Practice Exam

A00-260 Syllabus:

Objective	Details
Overview	<ul style="list-style-type: none"> - Define the architecture of the platform for SAS Business Analytics. - Describe the available interfaces including: <ul style="list-style-type: none"> • SAS Data Integration Studio • DataFlux Data Management Studio

Objective	Details
	<ul style="list-style-type: none"> - Define the change management feature of SAS Data Integration Studio. - Discuss the DataFlux Data Management Server.
<p>Creating Metadata for Source and Target Data</p>	<ul style="list-style-type: none"> - Define administrative tasks to be performed for SAS Data Integration Studio. - Describe the New Library Wizard. - Use Register Tables wizard to register source data. <ul style="list-style-type: none"> • Use Register Tables wizard to register metadata for a Microsoft Access database table using ODBC. - Use Register Tables wizard to register metadata for a Microsoft Access database table using ODBC. - Register metadata for a comma-delimited external file. - Import and Export Metadata. <ul style="list-style-type: none"> • Discuss SAS packages. • Discuss importing and exporting of relational metadata.
<p>Creating Metadata for Target Data and Jobs</p>	<ul style="list-style-type: none"> - Describe features of the New Table wizard. - Discuss components of Join's Designer window including: <ul style="list-style-type: none"> • Navigate pane • SQL clauses pane • Tables pane • Properties pane - Investigate mapping and propagation. - Work with performance statistics. <ul style="list-style-type: none"> • Enable/disable performance statistics. • Be able to view performance statistics. - Generate reports on metadata for tables and jobs. - Define Impact and Reverse Impact Analysis. - Import SAS code. <ul style="list-style-type: none"> • Import macro-based SAS code.
<p>Working with Transformations</p>	<ul style="list-style-type: none"> - Discuss and use the Extract and Summary Statistics transformation. - Discuss and use the Loop transformations. <ul style="list-style-type: none"> • Iterate a job. • Iterate a transformation. - Investigate where status handling is available. - Explain the functionality of the Data Validation transformation. <ul style="list-style-type: none"> • Identify and configure the three types of validations.

Objective	Details
	<ul style="list-style-type: none"> • Configure an error table and an exception table for data validation. <ul style="list-style-type: none"> - Discuss and use the Rank, Transpose, Append, List and Sort transformations. - Discuss and use the Apply Lookup Standardization transformation. - Discuss and use the Compare Tables transformation. - Discuss and use transformations in the SQL grouping of transformations. - Apply and use the Standardize with Definition transformation.
Working with Tables and the Table Loader Transformation	<ul style="list-style-type: none"> - Discuss reasons to use the Table Loader transformation. - Discuss various load styles provided by the Table Loader transformation. - Discuss various types of keys and how to define in SAS Data Integration Studio. - Discuss indexes and how to define in SAS Data Integration Studio. - Discuss Table Loader options for keys and indexes. - Discuss the Bulk Table Loader transformation. - Discuss and use the components of the Join's Designer Window related to in database processing.
Working with Slowly Changing Dimensions	<ul style="list-style-type: none"> - List the functions of the SCD Type 2 transformation. - Define keys. (business, surrogate, and retained) - Detect and track changes. - Discuss the Lookup transformation. - Discuss the SCD Type 1 Loader.
Defining Generated Transformations	<ul style="list-style-type: none"> - Define SAS code transformation templates. - Create a custom transformation
Deploying Jobs	<ul style="list-style-type: none"> - Discuss the types of job deployment available for SAS Data Integration Studio Jobs. - Provide an overview of the scheduling process. - Discuss the types of scheduling servers. - Discuss the Schedule Manager in SAS Management Console. - Discuss batch servers. - Describe deployment of SAS Data Integration Studio jobs as a SAS Stored Process.
In Database Processing	<ul style="list-style-type: none"> - Define in- database processing <ul style="list-style-type: none"> • List benefits of in-database processing - Enable in-database processing. - Define and discuss ELT methods - Use a DBMS function in a SAS DI job

Sample Questions:

Question: 1

In SAS Data Integration Studio, where can an index be specified/defined?

- a) in the Indexes tab in the properties of a Table Loader transformation
- b) in the Indexes tab in the properties of a table metadata object
- c) in the Select properties of the SQL Join transformation
- d) in the Results tab of Create Table transformation

Answer: b

Question: 2

Which transformation would you select to restructure a table by turning variables from a source table into observations in a target table?

- a) Rotate
- b) Pivot
- c) Transpose
- d) Flip

Answer: c

Question: 3

In SAS Management Console, which functions does the Schedule Manager plug-in perform?

- a) define and manage flows
- b) submit jobs to the batch server
- a) C) manage scheduling servers
- b) D) define batch servers

Answer: a

Question: 4

Which definition cannot be imported using a SAS Metadata Bridge?

- a) Column definition
- b) Library definition
- c) Server definition
- d) Table definition

Answer: c

Question: 5

You can perform Impact Analysis and Reverse Impact Analysis on which types of metadata objects?

- a) all metadata objects
- b) job metadata objects, library metadata objects, table metadata objects, column metadata objects
- c) library metadata objects, table metadata objects, column metadata objects, generated transformations
- d) table metadata objects, column metadata objects, generated transformations

Answer: d

Question: 6

In SAS Data Integration Studio, which statement regarding keys is true?

- a) A primary key must be a single column.
- b) A foreign key must be unique in a fact table.
- c) A generated key must include two columns or more.
- d) A business key can have duplicates in a dimension table.

Answer: d

Question: 7

How do you enable performance statistics for a SAS Data Integration Studio job?

- a) Define Collect Runtime Statistics on the SAS Data Integration Studio job.
- b) Define Collect Table Statistics on the SAS Data Integration Studio job.
- c) Define Collect Diagnostics on the SAS Data Integration Studio job.
- d) Define Collect Table Statistics on the SAS Data Integration Studio options.

Answer: a

Question: 8

Which statement regarding retained keys in SAS Data Integration Studio is true?

- a) A retained key is used to identify non-standard data values.
- b) A retained key is combined with a begin-date column to make up a primary key.
- a) C) A retained key prevents records from being re-initialized.
- b) D) A retained key allows multiple tables to be updated simultaneously.

Answer: b

Question: 9

Which transformations communicate with the DataFlux Data Management Server in order to access the list of objects available on the server?

- a) DataFlux Batch Job, DataFlux Data Service
- b) DataFlux Data Service, DataFlux Repository Manager
- c) DataFlux Repository Manager, DataFlux Batch Job
- d) DataFlux Server Explorer, DataFlux Data Service

Answer: a

Question: 10

Which operation can you perform with the Table Loader transformation?

- a) Pre-load formats.
- b) Load multiple tables.
- c) Maintain indexes and constraints.
- d) Perform insert/eliminate operations

Answer: c

Avail the Study Guide to Pass A00-260 SAS Data Integration Developer Exam:

- Find out about the A00-260 syllabus topics. Visiting the official site offers an idea about the exam structure and other important study resources. Going through the syllabus topics help to plan the exam in an organized manner.
- Once you are done exploring the [A00-260 syllabus](#), it is time to plan for studying and covering the syllabus topics from the core. Chalk out the best plan for yourself to cover each part of the syllabus in a hassle-free manner.
- A study schedule helps you to stay calm throughout your exam preparation. It should contain your materials and thoughts like study hours, number of topics for daily studying mentioned on it. The best bet to clear the exam is to follow your schedule rigorously.
- The candidate should not miss out on the scope to learn from the A00-260 training. Joining the SAS provided training for A00-260 exam helps a candidate to strengthen his practical knowledge base from the certification.
- Learning about the probable questions and gaining knowledge regarding the exam structure helps a lot. Go through the [A00-260 sample questions](#) and boost your knowledge

- Make yourself a pro through online practicing the syllabus topics. A00-260 practice tests would guide you on your strengths and weaknesses regarding the syllabus topics. Through rigorous practicing, you can improve the weaker sections too. Learn well about time management during exam and become confident gradually with practice tests.

Career Benefits:

Passing the A00-260 exam, helps a candidate to prosper highly in his career. Having the certification on the resume adds to the candidate's benefit and helps to get the best opportunities.

Here Is the Trusted Practice Test for the A00-260 Certification

VMExam.Com is here with all the necessary details regarding the A00-260 exam. We provide authentic practice tests for the A00-260 exam. What do you gain from these practice tests? You get to experience the real exam-like questions made by industry experts and get a scope to improve your performance in the actual exam. Rely on VMExam.Com for rigorous, unlimited two-month attempts on the [A00-260 practice tests](#), and gradually build your confidence. Rigorous practice made many aspirants successful and made their journey easy towards grabbing the SAS Certified Data Integration Developer.
