1Y0-440

Citrix Certified Expert - App Delivery and Security (CCE-AppDS)

64 Questions Exam – 65% Cut Score – Duration of 150 minutes

Table of Contents:

Discover More about the 1Y0-440 Certification

Are you interested in passing the Citrix 1Y0-440 exam? First discover, who benefits from the 1Y0-440 certification. The 1Y0-440 is suitable for a candidate if he wants to learn about Networking. Passing the 1Y0-440 exam earns you the Citrix Certified Expert - App Delivery and Security (CCE-AppDS) title.

While preparing for the 1Y0-440 exam, many candidates struggle to get the necessary materials. But do not worry; your struggling days are over. The 1Y0-440 PDF contains some of the most valuable preparation tips and the details and instant access to useful **1Y0-440 study materials just at one click**.

Citrix 1Y0-440 CCE-AppDS Certification Details:

Exam Name	Architecting a Citrix Networking Solution (CCE-AppDS)
Exam Code	1Y0-440
Exam Price	$300 USD
Duration	150 minutes
Number of Questions	64
Passing Score	65%
Recommended Training / Books	**CNS-420: Citrix Networking Assessment, Design, and Advanced Configuration**
Schedule Exam	**PEARSON VUE**
Sample Questions	**Citrix 1Y0-440 Sample Questions**
Recommended Practice	**Citrix Certified Expert - App Delivery and Security (CCE-AppDS) Practice Test**

1Y0-440 Syllabus:

Section	Objectives	Weight
Networking Methodology and Assessment	- Use the Citrix Methodology to plan projects. - Identify/Prioritize Business Drivers and Requirements. - Determine how to Segment users into defined use cases. - Determine key Application Assessment and Categorization. - Determine how to perform Capabilities Assessment.	11%
Citrix ADC Deployment Architecture and Topology	- Determine the appropriate Multi-Site Deployments design. - Determine how to design Multi Tennant Infrastructure. - Determine how to analyze Citrix Cloud design.	14%

Section	Objectives	Weight
Advanced Authentication and Authorization	- Determine how to review Configuration components for AAA - Determine how to evaluate the Authentication Process and options - Determine Session Management with AAA - Determine how to utilize and implement MultiFactor (nFactor) Authentication	**21%**
Citrix ADC Security	- Determine how to evaluate the Authorization configuration options - Determine the End Point Analysis Considerations - Define the correct protection against specific Layer 4-7 attacks	**12%**
VPN Configuration	- Determine how to evaluate VPN Access Scenarios and Configuration. - Determine how to Configure split tunneling and Authorization. - Determine RDP Proxy Configuration - Determine ICA Proxy Considerations	**12%**
Advanced Traffic Management	- Determine how to implement Advanced Load Balancing setup - Determine how to Implement Advanced Global Server Load Balancing setup	**11%**
Citrix Application Delivery Management Automation and Orchestration	- Determine how to use Citrix Application Delivery Management for Citrix ADC Automation - Determine how to assess the Orchestration ability - Determine how to utilize NITRO - Determine how to create Stylebooks	**19%**

Broaden Your Knowledge with Citrix 1Y0-440 Sample Questions:

Question: 1

A Citrix Architect can execute a configuration job using a DeployMasterConfiguration template on a Citrix ADC _____ deployed _____.

(Choose the correct option to complete sentence.)

a) CPX; as part of a high availability pair
b) CPX; as a stand alone device
c) SDX; with less than 6 partitions and dedicated management interface
d) MPX; as part of the cluster but Cluster IP is NOT configured
e) SDX; with no partitions as a stand alone device

Answer: e

Question: 2

What can help a Citrix Architect prepare to discuss time scales and resource requirements?

- a) Creating a high-level project plan.
- b) Meeting with each member of the project team to assign tasks.
- c) Designing the new environment.
- d) Setting expectations with the project's key stakeholders.
- e) Identifying challenges associated with the project.

Answer: a

Question: 3

Under which two circumstances will a service be taken out of the slow start phase with automated slow start? (Choose two.)

- a) The service does NOT receive traffic for three successive increment intervals.
- b) The server request rate parameters are set above 25 requests per second.
- c) The actual request rate is slower than the new service request rate.
- d) The percentage of traffic that the new service must receive is greater or equal to 50.
- e) The request rate has been incremented 100 times.

Answer: a, c

Question: 4

Which step does a Citrix Architect need to ensure during the define phase when following the Citrix Methodology?

- a) Testing steps were integrated.
- b) The project manager agrees with road map timelines.
- c) A phased roll out was completed.
- d) Existing networking infrastructure is ready.
- e) The redundancy deployment decision was made.

Answer: b

Question: 5

Which two features are supported on LBaaSv1? (Choose two.)

- a) Cookie Insertion
- b) Layer 7 Load Balancing
- c) Certificate Bundle
- d) Layer 4 Load balancing
- e) Server Name Indicator

Answer: a, d

Question: 6

Which three methods can a Citrix Architect use to assess the capabilities of a network infrastructure? (Choose three.)

a) Review existing monitoring solutions for periods of latency, lost packets, and insufficient bandwidth.
b) Map the location of the users against the existing network topology.
c) Alter firewall rules of existing network to fit into the new Citrix ADC Deployment.
d) Examine the topology for single points of failure and potential bottlenecks.
e) Ensure that users and computers are in the correct organizational units (OUs).

Answer: a, b, d

Question: 7

Scenario: A Citrix Architect needs to deploy a Citrix ADC for Workspacelab, which will provide application load balancing services to Partnerlab and Vendorlab.

The setup requirements are as follows:

- A pair of Citrix ADC MPX appliances will be deployed in the DMZ network.
- High Availability will be accessible on the Citrix ADC MPX in the DMZ Network.
- Load Balancing should be performed for the mail servers for Partnerlab and Vendorlab.
- Separate Management accounts must be available for each client.
- VLAN 120 must be used for data traffic of Vendorlab, and VLAN 150 must be used for the data traffic of Partnerlab.
- VLAN 160 must be used for the client-side traffic and must be shared between the partitions.

Which set of commands meets this requirement?

a) add vlan 160
    bind partition Vendorlab vlan 160
    set vlan 160 sharing ENABLED
    bind partition Partnerlab vlan 160 Hosted VDI
b) add vlan 160 sharing ENABLED
    bind partition Vendorlab vlan 160
    bind partition Partnerlab vlan 160
c) add vlan 160
    bind partition Vendorlab vlan 160
    set vlan 160 sharing ENABLED
    bind partition Partnerlab vlan 160
d) add vlan 160 sharing ENABLED
    switch partition Vendorlab
    bind partition Vendorlab vlan 160
    switch partition Partnerlab
    bind partition Partnerlab vlan 160

Answer: b

Question: 8

Which HTTP request method can a Citrix Architect utilize to send the API NITRO call to modify the attributes of an entity in the Citrix ADC configuration?

- a) GET
- b) POST
- c) PUT
- d) HEAD

Answer: c

Question: 9

Scenario: A Citrix Architect has implemented two high availability pairs of Citrix 5500 MPX and MPX 11500 respectively with 12.0.53.13 nc version. The Citrix ADC devices are set up to handle Citrix ADC Gateway, Load Balancing, Application Firewall, and Content Switching.

The Workspacelab infrastructure is set up to be monitored with Citrix Application Delivery Management version 12.0.53.13 nc by the Workspacelab administrators. The Workspacelab team wants to implement one more pair of Citrix ADC MPX devices 7500 with version 12.0.53.13 nc.

The Citrix consulting team has assigned the task to implement these Citrix ADC devices in the infrastructure and set them up to be monitored and managed by Citrix Application Delivery Management.

The following are the requirements that were discussed during the project initiation call:

- Citrix Application Delivery Management should be configured to get the infrastructure information under sections such as HDX Insight, WEB Insight, and Security Insight.
- Configuration on the new MPX devices should be identical to that of MPX 11500 devices.
- Configuration changes after the deployment and initial setup should be optimized using Citrix Application Delivery Management.
- Citrix Application Delivery Management should be utilized to configure templates that can be utilized by Workspacelab team in future deployments.
- As per the requirement from Workspacelab team, Citrix Application Delivery Management should store the audited data for only 15 days.

Which configuration setting should the consultant configure to ensure that the audited data is NOT stored for more than 15 days?

- a) System Prune settings
- b) Syslog Prune settings
- c) mps afdecoder logs to prune data after 15 days
- d) mps analytics logs to prune data after 15 days

Answer: a

Question: 10

Which four load-balancing methods support Citrix ADC Virtual Server-Level Slow Start?

(Choose four.)

a) URLHash
b) Least response time
c) Least Packets
d) Least Connection
e) Token
f) Least bandwidth
g) SRCIPSRCPORTHash

Answer: b, c, d, f

Avail the Study Guide to Pass Citrix 1Y0-440 CCE-AppDS Exam:

- Find out about the 1Y0-440 syllabus topics. Visiting the official site offers an idea about the exam structure and other important study resources. Going through the syllabus topics help to plan the exam in an organized manner.

- Once you are done exploring the **1Y0-440 syllabus**, it is time to plan for studying and covering the syllabus topics from the core. Chalk out the best plan for yourself to cover each part of the syllabus in a hassle-free manner.

- A study schedule helps you to stay calm throughout your exam preparation. It should contain your materials and thoughts like study hours, number of topics for daily studying mentioned on it. The best bet to clear the exam is to follow your schedule rigorously.

- The candidate should not miss out on the scope to learn from the 1Y0-440 training. Joining the Citrix provided training for 1Y0-440 exam helps a candidate to strengthen his practical knowledge base from the certification.

- Learning about the probable questions and gaining knowledge regarding the exam structure helps a lot. Go through the **1Y0-440 sample questions** and boost your knowledge

- Make yourself a pro through online practicing the syllabus topics. 1Y0-440 practice tests would guide you on your strengths and weaknesses regarding the syllabus topics. Through rigorous practicing, you can

improve the weaker sections too. Learn well about time management during exam and become confident gradually with practice tests.

Career Benefits:

- Passing the 1Y0-440 exam, helps a candidate to prosper highly in his career. Having the certification on the resume adds to the candidate's benefit and helps to get the best opportunities.

Here Is the Trusted Practice Test for the 1Y0-440 Certification

VMExam.Com is here with all the necessary details regarding the 1Y0-440 exam. We provide authentic practice tests for the 1Y0-440 exam. What do you gain from these practice tests? You get to experience the real exam-like questions made by industry experts and get a scope to improve your performance in the actual exam. Rely on VMExam.Com for rigorous, unlimited two-month attempts on the **1Y0-440 practice tests**, and gradually build your confidence. Rigorous practice made many aspirants successful and made their journey easy towards grabbing the Citrix Certified Expert - App Delivery and Security (CCE-AppDS).
