# Tableau CRM and Einstein Discovery Consultant Syllabus:

Section	Objectives	Weight
<b>Data Layer</b>	<ul style="list-style-type: none"> <li>- Given data sources, use Data Manager to extract and load the data into the Tableau CRM application to create datasets. Describe how the Salesforce platform features map to the Model-View-Controller (MVC) pattern.</li> <li>- Given business needs and consolidated data, implement refreshes, data sync (replication), and/or recipes to appropriately solve the basic business need. Identify the common scenarios for extending an application's capabilities using the AppExchange.</li> <li>- Given a situation, demonstrate knowledge of what can be accomplished with the Tableau CRM API.</li> <li>- Given a scenario, use Tableau CRM to design a solution that accommodates recipe limits.</li> </ul>	<b>24%</b>
<b>Security</b>	<ul style="list-style-type: none"> <li>- Given governance and Tableau CRM asset security requirements, implement necessary security settings including users, groups, and profiles.</li> <li>- Given row-based security requirements and security predicates, implement the appropriate dataset security settings.</li> <li>- Implement App sharing based on user, role, and group requirements.</li> </ul>	<b>11%</b>
<b>Administration</b>	<ul style="list-style-type: none"> <li>- Using change management strategies, manage migration from sandbox to production orgs.</li> <li>- Given user requirements or ease-of-use strategies, manage dataset extended metadata (XMD) by affecting labels, values, and colors.</li> <li>- Given a scenario, improve dashboard performance by restructuring the dataset and/or data using lenses, pages, and filters.</li> <li>- Given business and access requirements, enable Tableau CRM, options, and access as expected.</li> </ul>	<b>9%</b>
<b>Tableau CRM Dashboard Design</b>	<ul style="list-style-type: none"> <li>- Given a customer situation, determine and define their dashboarding needs.</li> <li>- Given customer requirements, create meaningful and relevant dashboards through the application of user experience (UX) design principles and Tableau CRM best practices.</li> <li>- Given business requirements, customize existing Tableau CRM template apps to meet the business needs.</li> </ul>	<b>19%</b>
<b>Tableau CRM Dashboard Implementation</b>	<ul style="list-style-type: none"> <li>- Given business requirements, define lens visualizations such as charts to use and dimensions and measures to display.</li> <li>- Given customer business requirements, develop selection and results bindings/interactions with static</li> </ul>	<b>18%</b>

Section	Objectives	Weight
	queries. - Given business expectations, create a regression time series. - Given customer requirements, develop dynamic calculations using compare tables. - Given business requirements that are beyond the standard user interface (UI), use Salesforce Analytics Query Language (SAQL) to build lenses, configure joins, or connect data sources.	
<b>Einstein Discovery Story Design</b>	- Given a dataset, use Einstein Discovery to prepare data for story output by accessing data and adjusting outputs. - Given initial customer expectations, analyze the story results and determine suggested improvements that can be presented to the customer. - Given derived results and insights, adjust data parameters, add/remove data, and improve story as needed. - Understand models in production and enable prediction features across Salesforce CRM and Tableau CRM.	<b>19%</b>

## Broaden Your Knowledge with Salesforce Tableau CRM and Einstein Discovery Consultant Sample Questions:

### Question: 1

Benito has Viewer access to a new EinsteinAnalytics app. He wants to build and edit a dashboard using the Seed Bank dataset in this new app. What must an admin do for Benito to do this?

- Grant Benito access to all datasets in the org.
- Assign Benito a permission set that contains the permission: Create and Edit Analytics Dashboards.
- Grant Benito access to the app that contains the Seed Bank dataset and assign him a permission set that contains the Create and Edit Analytics Dashboards permission.
- Assign Benito a permission set that contains the permission: Create and Manage Analytics Apps.

**Answer: c**

**Question: 2**

How do you analyze data from a CSV file using Einstein Discovery?

- a) Import the CSV file into Einstein Discovery.
- b) Import the CSV file into the most similar Salesforce object, then run reports on that object.
- c) You can't import data from a CSV file
- d) Import the CSV file into an Einstein Analytics dataset, then create a story.

**Answer: d**

**Question: 3**

Why is it important to prepare the data in a CSV file before you bring it into Analytics?

- a) To make sure Analytics can set the field type correctly
- b) To make sure the content is interesting
- c) To add currency symbols to numeric fields
- d) To remove column headers

**Answer: a**

**Question: 4**

In the Insights list, insights are ranked in what order?

- a) Statistical significance
- b) Time
- c) Geospatial
- d) Alphabetical
- e) There is no order

**Answer: a**

**Question: 5**

A client has a dashboard for Sales Managers. They want to have a list filter that shows the name of the month. However, based on the "CloseDate\_Month" field, the list filter shows numbers instead of names. How can a Tableau CRM Consultant use the Dataflow nodes to generate the name of month as a new dimension in the dataset?

- a) flatten
- b) append
- c) computeRelative
- d) computeExpression

**Answer: c**

**Question: 6**

When creating a story in Einstein Discovery, a client is wondering if all potential collinear fields need to be removed before executing the build story. What would accurately answer the client's question?

- a) Yes. If the collinear variables are not removed, the Einstein Discovery model build will fail.
- b) No. Although it is ideal to eliminate collinearity as soon as possible, Einstein will give a warning post-build, and the ridge regression will prevent collinearity from overfitting.
- c) Yes. If all collinear variables are not excluded, the model will overfit and not make any sense.
- d) No. Einstein Discovery is impervious to collinearity, so the story and subsequent model will be fine.

**Answer: b****Question: 7**

Where can you view the status of a CSV upload in Analytics?

- a) The data manager
- b) The Analytics home page
- c) The Create Dataset page
- d) The Setup menu

**Answer: a****Question: 8**

What are the two types of bindings?

- a) Results binding
- b) Data bindings
- c) Description bindings
- d) Selections bindings

**Answer: a, d****Question: 9**

What can you do on the Edit Field Attributes page when uploading a CSV file to Analytics?

- a) Change a field's name
- b) Change a field's format
- c) Change a field's type
- d) All of the above

**Answer: d**

**Question: 10**

How many concurrent stories per org are allowed?

- a) 5
- b) 4
- c) 2
- d) 1

**Answer: c**
