## Discover More about the QSDA2022 Certification

Are you interested in passing the Qlik QSDA2022 exam? First discover, who benefits from the QSDA2022 certification. The QSDA2022 is suitable for a candidate if he wants to learn about Qlik Sense. Passing the QSDA2022 exam earns you the Qlik Sense Data Architect title.

While preparing for the QSDA2022 exam, many candidates struggle to get the necessary materials. But do not worry; your struggling days are over. The QSDA2022 PDF contains some of the most valuable preparation tips and the details and instant access to useful [QSDA2022 study materials just at one click](#).

## QSDA2022 Qlik Sense Data Architect Certification Details:

<b>Exam Name</b>	Qlik Sense Data Architect
<b>Exam Code</b>	QSDA2022
<b>Exam Duration</b>	120 minutes
<b>Exam Questions</b>	50
<b>Passing Score</b>	60%
<b>Exam Price</b>	\$250 (USD)
<b>Books</b>	<a href="#">Data Architect</a> <a href="#">Data Modeling for Qlik Sense</a>
<b>Exam Registration</b>	<a href="#">Pearson VUE</a>
<b>Sample Questions</b>	<a href="#">Qlik Sense Data Architect Certification Sample Question</a>
<b>Practice Exam</b>	<a href="#">Qlik Sense Data Architect Certification Practice Exam</a>

## QSDA2022 Syllabus:

Objective	Details
<b>Identify Requirements</b> (20% of the exam)	<ul style="list-style-type: none"> <li>- Determine primary requirements with business users.</li> <li>- Given a scenario, choose stakeholders.</li> <li>- Given a scenario, determine metrics and levels of granularity and aggregation.</li> <li>- Determine dimensionality and need for slowly changing dimensionality support.</li> <li>- Given a scenario, determine the appropriate level of security.</li> </ul>
<b>Data Connectivity</b> (8% of the exam)	<ul style="list-style-type: none"> <li>- Given a scenario, determine the data sources and connectors needed.</li> <li>- Determine the appropriate method to create connections for data sources.</li> </ul>
<b>Data Model Design</b> (28% of the exam)	<ul style="list-style-type: none"> <li>- Given a scenario, determine the measures and attributes from each data source.</li> <li>- Given a scenario, identify the appropriate type of data model.</li> <li>- Determine the correct method to optimize the data model for Qlik Sense.</li> <li>- Determine the correct method to implement data structures efficiently.</li> </ul>
<b>Data Transformations</b> (38% of the exam)	<ul style="list-style-type: none"> <li>- Determine the correct method to build data content based on requirements.</li> <li>- Analyze and evaluate null and blank data handling required to support filtering.</li> <li>- Determine the correct method to document Data Load scripts.</li> <li>- Determine the correct method for date handling techniques.</li> <li>- Determine the correct method to perform script organization and cleansing.</li> <li>- Analyze relevant variables to build scripts for incremental loading for extract layer.</li> </ul>
<b>Validation</b> (6% of the exam)	<ul style="list-style-type: none"> <li>- Given a scenario, determine the appropriate method to validate and test scripts.</li> <li>- Given a scenario, determine the appropriate method to validate and test data.</li> </ul>

# Broaden Your Knowledge with Qlik QSDA2022 Sample Questions:

## Question: 1

A data architect makes changes to a data model in an app that has 123 million rows of data. Each time the data is loaded, it takes 30 minutes. The data architect must limit the time required to validate changes to the data model.

What should the data architect do?

- a) Open the debugger, set number of lines to 100, and click Run
- b) Insert a breakpoint at the LOAD command, open the debugger, and 0 step through the code
- c) Open the debugger, check Limited Load, and click Run
- d) Create a smaller data set in the database to load into the app

**Answer: c**

## Question: 2

User A is the owner of a Qlik Sense app that uses section access. User A is NOT included in the Section. Access table of the app. The app is published in the Sales stream. A security rule grants User A access to the Sales stream.

User A accesses the Sales stream in the hub to open the app. What is the result?

- a) User A sees the app in the Sales stream, but is unable to open it and sees an "Internal Error" message
- b) User A does NOT see the app in the Sales stream
- c) User A sees the app in the Sales stream and is able to open the app
- d) User A sees the app in the Sales stream, but is unable to open it and sees an "Access Denied" message

**Answer: d**

## Question: 3

A sales team has access to a Sales Performance app. The app contains the Sales Goal metric, which is a complex calculation used in multiple visualizations. Individual users must drag and drop the Sales Goal metric into their own analyses.

What should a data architect create to store the formula to calculate the Sales Goal?

- a) A master item in the assets panel
- b) A variable in the assets panel
- c) A variable in the data load editor
- d) A master item in the data load editor

**Answer: a**

**Question: 4**

A data architect notices an issue with a measure in the master items. Item '5126' is used only for testing and must be excluded from the total.

Which is the correct expression to meet this requirement?

- a) =Sum({\$<ItemNumber -= {5126}>}[Total Value])
- b) =Sum({\$-ItemNumber = {" 5126"}>}[Total Value])
- c) =Sum({\$<ItemNumber = {}5126}>}[Total Value])
- d) =Sum({\$<ItemNumber != {"5126"}>}[Total Value])

**Answer: a**

**Question: 5**

An analyst needs to review sales information for the previous year-to-date and the current year. The data in the sales app is refreshed daily.

The Date field contains both past and future dates. The data architect decides to create two flags as master items.

Which two functions will meet these requirements?

(Select two)

- a) YearToDate(Date)
- b) SetDateYear(Date,1)
- c) InYear(Date,Today,0)
- d) YearToDate(Date,-1)
- e) InYearToDate(Date-365,Today())

**Answer: a, d**

**Question: 6**

A data architect is using the Qlik View converter to load a Qlik View document into Qlik Sense. The convertor does not load the Qlik View document correctly.

Which two reasons will cause the convertor to fail?

(Select two)

- a) Show/hide conditions are used in the Qlik View document
- b) The Qlik View document contains hidden scripts
- c) The Qlik View document has section access applied
- d) Variables have been used in the Qlik View load script
- e) The Qlik View document contains charts not found in Qlik Sense

**Answer: b, c**

**Question: 7**

A data architect creates a new Finance app in Qlik Sense Desktop and is ready to publish it so that Finance users and Executives are able to access it.

The app contains a single data connection called PRODDB. The Qlik Sense Enterprise hub has several streams configured and secured: Sales, HR, Finance and Executive, IT, and Everyone.

Which instructions should the data architect provide to the system administrator to make sure that the app can be reloaded daily and accessed by the right users?

- a) 1. Import the new Finance app and publish to the 'Finance and Executive' stream  
2. Create the data connection called PRODDB
- b) 1. Publish the app QVF file to the 'Finance and Executive' stream  
2. Publish the data connection, PRODDB, to the 'Finance and Executive' stream
- c) 1. Import the new Finance app and publish to the 'Finance' stream  
2. Import the data connection called PRODDB
- d) 1. Copy the app QVF file to the 'Finance and Executive' directory  
2. Create a new data connection called PRODDB

**Answer: b**

**Question: 8**

A data architect is building an app for a large healthcare organization, and is given these requirements:

- Load data from SQL Server for eight hospitals
- Load data from Oracle for six hospitals
- All data must be refreshed once per day
- Users must see details of each transaction
- Most users should only see data for their hospital
- Some users will have access to all data

Which approach should the data architect take?

- a) Create a task that runs daily to load data from each system  
Use an incremental load strategy to add the daily data  
Create security rules in the QMC
- b) Create a task that runs daily to load data from each system  
Use an incremental load strategy to add the daily data  
Use section access
- c) Build a data warehouse from all sources  
Create a task that runs daily to load data from each system  
Create security rules in the QMC
- d) Create a task that runs daily to load data from each system  
Use a binary load process to load the data  
Use Section access

**Answer: b**

**Question: 9**

A data architect must load data from an online source using the REST connector. The REST endpoint must be called several times and pass different values into a query parameter each time to retrieve all required data.

The URL and the other query parameters do NOT change between calls. The parameter values are stored in an existing table in the data model. These values have been previously loaded and may change during each data reload.

A REST connector has already been set up with the appropriate URL and static query parameters.

Which steps should the data architect use to retrieve all data?

- a) 1. Select the Add missing query parameters checkbox in the REST connector
- 2. Use a FOR loop, No Of Rows () and Peek() functions
- 3. Use WITH CONNECTION to add the relevant query parameter
- b) 1. Amend the REST connector and add the new query parameter with a value of \*
- 2. Ensure the association field matches the previous table
- 3. Perform a LEFT KEEP to ensure only the needed results are loaded
- c) 1. Create a new REST connection for each query value
- 2. Use a FOR loop, No Of Rows () and Peek () functions
- 3. Call the appropriate REST connection dynamically for each loop iteration
- d) 1. Copy the URL from the REST connector and create a Web File connector
- 2. Use a FOR loop, No Of Rows () and Peek () functions
- 3. Amend the Web File connector URL in each iteration

**Answer: a**

**Question: 10**

The Human Resources department sends the data architect an Employees table with newly hired employees in a monthly spreadsheet.

The spreadsheet always has the same data structure and fields, but sometimes includes duplicates of previously hired employees. The data architect must load the Employees table into the data model each month, without duplication of the records.

Which action should the data architect take to meet this requirement?

- a) Load the first Employees table and perform a full OUTER JOIN with the latest Employees table to the original.
- b) Load the first Employees table, updating the next month's Employees table using WHERE NOT EXISTS clause
- c) Load the Employees table by concatenating the latest Employees table to the previous month's table.
- d) Load the Employees table each month and LEFT JOIN the current table to the previous month's table.

**Answer: b**

## Avail the Study Guide to Pass QSDA2022 Qlik Sense Data Architect Exam:

- Find out about the QSDA2022 syllabus topics. Visiting the official site offers an idea about the exam structure and other important study resources. Going through the syllabus topics help to plan the exam in an organized manner.
- Once you are done exploring the [QSDA2022 syllabus](#), it is time to plan for studying and covering the syllabus topics from the core. Chalk out the best plan for yourself to cover each part of the syllabus in a hassle-free manner.
- A study schedule helps you to stay calm throughout your exam preparation. It should contain your materials and thoughts like study hours, number of topics for daily studying mentioned on it. The best bet to clear the exam is to follow your schedule rigorously.
- The candidate should not miss out on the scope to learn from the QSDA2022 training. Joining the Qlik provided training for QSDA2022 exam helps a candidate to strengthen his practical knowledge base from the certification.
- Learning about the probable questions and gaining knowledge regarding the exam structure helps a lot. Go through the [QSDA2022 sample questions](#) and boost your knowledge
- Make yourself a pro through online practicing the syllabus topics. QSDA2022 practice tests would guide you on your strengths and weaknesses regarding the syllabus topics. Through rigorous practicing, you can improve the weaker sections too. Learn well about time management during exam and become confident gradually with practice tests.

## Career Benefits:

Passing the QSDA2022 exam, helps a candidate to prosper highly in his career. Having the certification on the resume adds to the candidate's benefit and helps to get the best opportunities.

## Here Is the Trusted Practice Test for the QSDA2022 Certification

VMEExam.Com is here with all the necessary details regarding the QSDA2022 exam. We provide authentic practice tests for the QSDA2022 exam. What do you gain from these practice tests? You get to experience the real exam-like questions made by industry experts and get a scope to improve your performance in the actual exam. Rely on VMEExam.Com for rigorous, unlimited two-month attempts on the [QSDA2022 practice tests](#), and gradually build your confidence. Rigorous practice made many aspirants successful and made their journey easy towards grabbing the Qlik Sense Data Architect.
