While preparing for the Analytics-DA-201 exam, many candidates struggle to get the necessary materials. But do not worry; your struggling days are over. The Analytics-DA-201 PDF contains some of the most valuable preparation tips and the details and instant access to useful **Analytics-DA-201 study materials just at one click.**

Salesforce Analytics-DA-201 Tableau Data Analyst Certification Details:

Exam Name	Salesforce Tableau Data Analyst
Exam Code	Analytics-DA-201
Exam Duration	105 minutes
Exam Questions	65
Passing Score	65%
Exam Price	Registration fee: $200 (USD) Retake fee: $100 (USD)
Books / Training	**Analyst Learning Path** **Tableau Desktop I: Fundamentals** **Tableau Desktop II: Intermediate** **Tableau Prep I**
Exam Registration	**Pearson VUE**
Sample Questions	**Salesforce Tableau Data Analyst Certification Sample Question**
Practice Exam	**Salesforce Tableau Data Analyst Certification Practice Exam**

Analytics-DA-201 Syllabus:

Objective	Details
Connect to and Transform Data - 24%	
Connect to Data Sources	- Identify data source - Determine live connection vs. extract - Connect to extracts - Connect to files - Connect to relational databases - Connect to published data sources from a Tableau Server or Tableau Cloud site - Replace the connected data source with another data source for an existing chart or sheet
Prepare data for analysis	- Assess data quality (completeness, consistency, accuracy) - Perform cleaning operations - Organize data fields into folders - Use multiple data sources (establish relationships, create joins, union tables) - Prepare data by using Data Interpreter, pivot, and split - Create extract and data source filters
Perform data transformation in Tableau Prep	- Choose which data transformation to perform based on a business scenario - Combine data by using unions - Combine data by using joins - Shape data by using aggregations - Perform filtering - Shape data by using pivots - Determine which output type to use
Customize fields	- Change default field properties (types, sorting, etc.) - Rename columns - Choose when to convert between discrete and continuous - Choose when to convert between dimension and measure - Create aliases
Explore and Analyze Data - 41%	
Create calculated fields	- Write date calculations - Write string functions

Objective	Details
	- Write logical and Boolean expressions - Write number functions - Write type conversion functions - Write aggregate functions - Write basic spatial calculations
Create table calculations	- Moving average and window average - Percent of total - Running total - Difference and percent of difference - Percentile - Index - Ranking - Apply quick table calculations - Customize table calculations
Create and use filters	- Apply filters to dimensions and measures - Configure filter settings including Top N, Bottom N, include, exclude, wildcard, and conditional - Add filters to context - Apply filters to multiple sheets and data sources
Create parameters to enable interactivity	- In calculations - With filters - With reference lines - Set parameters to dynamically refresh
Structure the data	- Sets - Bins - Hierarchies - Groups
Map data geographically	- Create symbol maps - Create density maps - Create choropleth maps (filled maps) - Create mark layers
Summarize, model, and customize data by using the Analytics pane	- Totals and subtotals - Reference lines - Reference bands - Average lines - Trend lines - Distribution bands - Forecast by using default settings - Customize a data forecasting model

Objective	Details
Create Level of Detail (LOD) calculations	- Write FIXED LOD calculations - Write INCLUDE LOD calculations - Write EXCLUDE LOD calculations - Write nested LOD calculations
Create Content - 26%	
Create charts	- Create basic charts from scratch (bar, line, pie, highlight table, scatter plot, histogram, tree map, bubbles, data tables, Gantt, box plots, area, dual axis, combo) - Sort data (including custom sort)
Create dashboards and stories	- Combine sheets into a dashboard by using containers and layout options - Add objects (containers, images, text) - Create stories using story points
Add interactivity to dashboards	- Use filter in a dashboard - Add filter, URL, and highlight actions - Create interactivity using dynamic zone visibility - Add navigation buttons - Create interactivity using set and parameter actions - Create show/hide buttons for dashboard objects
Format workbooks, worksheets, and dashboards	- Apply color, font, shapes, styling - Add custom shapes and color palettes - Add annotations - Customize tooltips - Apply padding - Format gridlines, row-level and column-level bands, and shading - Create a responsive design for specific device layouts
Publish and Manage Content on Tableau Server and Tableau Cloud - 9%	
Publish Content	- Publish a workbook - Publish a data source from Desktop or Prep - Export content - Publish a flow
Schedule data updates	- Schedule data extract refreshes
Manage Published workbooks	- Create alerts - Create subscriptions

Objective	Details
	- Create and save custom views - Understand user roles and permissions - Customize and distribute a published workbook

Broaden Your Knowledge with Salesforce Analytics-DA-201 Sample Questions:

Question: 1
